

Alexandra Drane, Wellness Expert

For more than 20 years, Alexandra Drane has focused on using technology to help people live happier, healthier and more productive lives. She brings the full force of her experience, vision and determination to address the biggest challenges we face as individuals, companies and as a nation. A serial entrepreneur, Alexandra is the co-founder of ARCHANGELS, Rebel Health, Engage with Grace, and Eliza Corporation (among others), all rooted in her core belief that the definition of health should include “life.” True to this belief, Alex also works part-time as a cashier at Walmart to better understand how retail is at the frontline of health.

Alex was named one of Disruptive Women in Healthcare’s “Women to Watch” in 2014, and one of *Boston Globe’s* 2013 Top 100 Women Leaders. She is an inventor on multiple patents, serves on the Board of Advisors of TEDMED and the Harvard Executive Sleep Council, and vice chair of the Board of Trustees for Beth Israel Deaconess Medical Center, a Harvard Teaching Hospital. Additionally, she is a Governor-appointed member of the Executive Committee for the Board of Directors for the Massachusetts Technology Collaborative, member of the Board of Directors of the Coalition to Transform Advanced Care (C-TAC), and part of the Health Executive Leadership Network.

Alexandra Drane’s background in the healthcare industry made her the ideal candidate to join Prudential Financial in exploring the unique and modern challenges (and opportunities) facing Americans today in a new film series called “The State of US.”
